About FSN Solution Limited

FSN Solution is an IT Services company dedicated to transforming businesses and industries through Innovative IT solutions. Headquartered in New York City, USA, with a subsidiary in Dhaka, Bangladesh, the company provides Cyber Security services.

We have development teams in the USA and Bangladesh.

We differentiate ourselves from the competition by having a deep understanding of Bangladesh's business landscape with its own set of uniqueness and compliance needs, combined with providing state-of-the-art solutions customized to meet clients' requirements.

Our Mission

To deliver cutting-edge cyber security solutions to our customers enabling them to protect their critical infrastructure and assets.

Our Vision

Our vision is to create opportunities for Bangladeshi Youths in Information Technology through Continuous Learning.

Senior Management Team

FSN Solution was founded by a group of highly motivated Bangladeshi American entrepreneurs and academics in 2022, to serve Bangladesh industries with cyber security-related services. The company has recruited a highly skilled and experienced team to satisfy clients' needs.

Founder and CEO: Mr. Misba Abdin

Misba Abdin, hails from Beanibazar, Sylhet, Bangladesh. Misba's entrepreneurial journey led him to the USA in 1982. As the CEO of FSN Solution and the founder of multiple ventures, he balances business acumen with a deep dedication to philanthropy. He co-founded Bangladeshi American Community Development and Youth Services (BACDYS) in 2009 in New York and he is a force for change.

CTO: Dr. Bart Stuck

Dr. Bart Stuck, our Chief Technology Officer, has a PhD in Electrical Engineering and Computer Science from MIT. He was a Senior Scientist at Bell Laboratories in USA for 14 years, where he authored 32 technical papers and co-authored 4 patents. Dr. Stuck has left an indelible mark on the telecommunications and IT industry. His role at FSN Solution embodies a commitment to innovation that pushes boundaries and shapes the future of technology.

The company is working with a number of additional US academics who have more than 60 years of industry experience in total. The average experience of the Bangladesh team is between 8 to 10 years.

Our Cyber Security Team

We have a team of highly skilled and experienced Engineers ready to be deployed for any cybersecurity program. We can ramp up our team as the need arises.

- Company Name: FSN Solution Limited.
- Company Address in Bangladesh: Plot-16, Road-3, Sector-4, Uttara, Dhaka.
- Company Address in USA: 74-02, 101 Avenue, Ozone Park, NY 11416, USA
- Contact Number: +88 01931177234
- Founder and CEO: Mr. Misba Abdin
- Incorporation Certificate No: C-189058/2023
- Trade License No: TRAD/DNCC/154681/2022
- TIN:180231921079
- BIN:005692309-0101

FSN's Business

- We are in the Business of Supplying Security Products and Services to Our Customers in Bangladesh and outside Bangladesh.
- Our Flagship Product is Our Proprietary SOC Solution.
- Our SOC Product Can Be Configured for on Premises Solution or as a Managed Services Configuration.
- We Have Partnership with Rapid7, IBM, SOPHOS, FORTINET, PALO ALTO, Trend Micro, Wazuh etc OEMS Offering Security Solutions.

FSN's Cyber Security Services Offering

At FSN Solution Limited, we offer a full spectrum of cyber security services designed to safeguard your business. Our services include:

- **Security Operations Center (SOC) Solutions and Services**
Provides continuous monitoring, detection, and response to security incidents within an organization.
- **Vulnerability Assessment and Penetration Testing (VAPT)**
Combines vulnerability assessments and penetration testing to identify and address security weaknesses.
- **Cyber Security Training**
Provides education and training on cybersecurity best practices and awareness.
- **Cyber Security Policy Development and Upgradation**
Develops and updates security policies to enhance organizational security.
- **Cyber Security Gap Analysis**
Identifies gaps in current security measures and recommends improvements.
- **Cyber Security Risk Management**
Manages and mitigates security risks within an organization.
- **Red Team & Blue Team Services**
Engages in simulated attacks (Red Team) and defensive measures (Blue Team) to improve security posture.
- **Network Vulnerability Assessment**
Scans internal and external networks for potential security weaknesses.
- **Web Application Penetration Testing**
Tests web applications for common vulnerabilities like SQL injection and XSS.
- **Mobile Application Penetration Testing**
Evaluates mobile apps on Android and iOS for security flaws.
- **Wireless Network Penetration Testing**
Tests Wi-Fi networks for vulnerabilities such as weak encryption and rogue access points.
- **Social Engineering Assessment**
Conducts phishing simulations and social engineering attacks to test employee awareness.
- **Database Security Testing**
Tests databases for vulnerabilities like SQL injection and improper access controls.
- **Source Code Security Review**
Identifies security flaws within application source code.
- **Cyber Forensic Services**
Provides detailed analysis and investigation of digital crimes and incidents.

Security Operations Center (SOC)

FSN **Security Operations Center (SOC)** is at the heart of our cyber security offerings. It provides comprehensive, real-time monitoring and management of your security infrastructure to detect, respond to, and mitigate cyber threats. Our SOC services are available in two configurations:

- **On-Premises SOC:** Tailored to integrate seamlessly with your existing infrastructure, offering in-depth monitoring, threat detection, and incident response within your own environment.
- **Managed SOC Services:** A cloud-based solution where our experts manage and monitor your security environment 24/7 from our facilities, ensuring you benefit from continuous protection without the need for in-house resources.

Vulnerability Assessment and Penetration Testing (VAPT)

Vulnerability Assessment and Penetration Testing (VAPT) are critical components of a proactive security strategy. We offer:

- **Vulnerability Assessment:** A systematic examination of your IT environment to identify security weaknesses and vulnerabilities. Our assessment provides a comprehensive report on potential risks and recommendations for remediation.
- **Penetration Testing:** A simulated cyber attack conducted to test the effectiveness of your security defenses. Our experts attempt to exploit vulnerabilities to assess the potential impact and provide actionable insights to enhance your security posture.

By combining vulnerability assessments with penetration testing, we help you identify and address weaknesses before they can be exploited by malicious actors.

Forensic Services

Cyber Forensics is essential for investigating and understanding security incidents. Our forensic services include:

- **Incident Investigation:** Detailed analysis of security breaches to determine the cause, impact, and extent of the incident. We help identify compromised systems, recover lost data, and gather evidence for legal proceedings if necessary.
- **Data Recovery:** Specialized techniques to recover lost, deleted, or corrupted data from digital devices. This includes file restoration, data extraction, and forensic analysis to support ongoing investigations.
- **Evidence Preservation:** Ensuring that digital evidence is collected, preserved, and documented in a manner that maintains its integrity for legal and regulatory compliance.

Our forensic experts use advanced tools and methodologies to provide a clear understanding of security incidents, enabling you to respond effectively and prevent future occurrences

In an era where digital threats are ever-evolving and increasingly sophisticated, FSN Solution Limited stands as a beacon of innovation and reliability in the cybersecurity landscape. Our unwavering commitment to safeguarding your digital assets is reflected in our cutting-edge solutions, expert team, and dedication to excellence. With a track record of delivering tailored, robust security measures, we empower businesses to navigate the complex cyber terrain with confidence and resilience.

At FSN Solution Limited, we understand that security is not a one-time solution but an ongoing partnership. As technology continues to advance and new threats emerge, we are poised to adapt and evolve, ensuring that your organization remains protected today and in the future. Choose us to be your trusted ally in cybersecurity, and together, we will fortify your defenses, protect your data, and enable your growth.

Let us help you secure your digital future—contact us today to learn how our expertise can be your greatest asset.
